**DETAILED ACTION**

***Specification***

1. The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: indepednet claims 1 and 4, where a seven layers show on figures and specification and how to process for electroluminescent film.

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.

***Claim Objections***

2. Claims 1-10 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-10 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

Art Unit: 2821

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under best understood 35 U.S.C. 102(b) as being unpatentable by Chan et al (US 6,638,205).

Regarding claim 1, Chan discloses a pliable, transparent, nonconductive substrate a cord made of a resistive material surrounding at least one zone, and in that one then proceeds to deposit at least layers of an electroluminescent material by coating and drying, and that the complex prepared in this manner is then covered by a pliable film. See figures 2-5, col.6, lines 63-37 to col.14, lines 1-45.

Regarding claim 2, Chan discloses the number of layers of electroluminescent material. See figures 1b.

Regarding claim 3, Chan discloses a pliable material is deposited between the electroluminescent zones. See figures 2-5, col.6, lines 63-37 to col.14, lines 1-45.

Art Unit: 2821

Regarding claims 4-10, , Chan discloses a layers of electroluminescent material, with the entire assembly being coated with a pliable film forming the rear surface, with the conductive cord(s) being provided with an electrical connection means. See figures 2-5, col.6, lines 63-37 to col.14, lines 1-45.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chipalkatti et al (US 2001/0053082) is cited to show an electroluminescent vehicle lamp.
